TC40H155 DUAL 2-TO-4-LINE DECODER/DEMULTIPLEXER

The TC40H155 is a dual decoder/demultiplexer.

When STROBE="L", arbitrary one of four outputs can be selected by two common binary inputs A and B. The selected output goes to "L" level.

When the STROBE is set to "H" level, the output selection is inhibited, all the outputs go to "H" level regardless of other input signals.

Further, the TC40H155 can be used as 3-to-8-line decoder or 1-to-8-line demultiplexer by a combination of each input.
