

Easy User Guide

Cardioline HD+ ECG System

1

Ensure the **Bluetooth adapter** is **connected** to your **PC** or **Laptop**.

2

Power on the **device**.

3

Open the patient's **clinical record** in your clinical system.

Note: Vision Hosted and AEROS sites must ensure that Numed Enterprise Link software is running on the remote desktop

4

Double click the **I³** icon, this is usually found on your taskbar or desktop. This will **launch** the **I³** software.

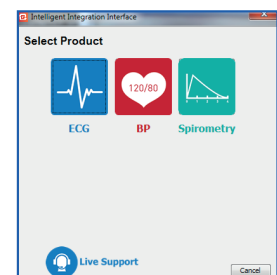

5

Click the **'Start'** button.

6

Select **'ECG'** from the product selection screen - if you have more than one ECG system you may need to select **'TouchECG HD+'**.

7

You will now be presented with the **device selection window**; by default, the serial number of the device that was last used will appear on screen. If this correct **select 'Yes' to continue**.

8

If you have **more than one device** select **'No'** and choose the appropriate **serial number from the drop-down list** and select **'Yes'** to continue.

9

Confirm the patient's details are correct then click **'Yes'**.

10

Once you are happy with the **ECG trace**, press the **'Auto' button**. There may be a **delay of up to 10 seconds** whilst the ECG is acquired.

11

Once the **acquisition process has completed** press the **'Standby' button**.

12

After a few seconds, the **Comments box will appear**. Enter any applicable information and **click 'Send' to complete** the filling process.

13

A **confirmation message** will be displayed when the **ECG** has been successfully uploaded to the patient record - click **'OK'** to complete the process.

If you experience any problems using **Cardioline HD+**, please contact our technical support team on: **0114 399 0010** or visit **www.numed.co.uk/support**
