- Short press to directly access Send new SMS from idle mode
- Short press from the **Phonebook** or the **Call log** menu to edit an SMS

*Warning : Handsfree activation could suddenly increase the volume in the earpiece to a very high level. Make sure the handset is not too close to your ear.

The display gives information about the operation of your telephone

On first use, it is sometimes necessary to wait for a few minutes of charge before seeing icons on the display.

When charging, the battery bars scroll from empty to full status.
When the handset discharges, the battery shows the status :
Full , 2/3 , 1/3 and empty .

The answer machine is activated (DECT 515). **When blinking**, this symbol indicates that there is a new message on the answer machine or on the operator voice mailbox. **When fast blinking** it shows that the answer machine is full.

The ring tone is deactivated.

An external call is in progress. **When blinking**, this symbol indicates that there is an incoming external call in progress or that the line is already busy.

An internal call is in progress. **When blinking**, this symbol indicates that there is an internal incoming call.

The handset loudspeaker is activated. **When blinking**, this symbol shows that the base loudspeaker is activated (only for DECT 515).

The SMS function is activated. **When blinking**, this symbol indicates that a new SMS has been received. **When fast blinking**, it indicates that the SMS memory is full.

The handset is registered and in range of the base. **When blinking**, this symbol indicates that the handset is not registered to the base.

DECT 511 base station

Paging key

The paging key enables you to locate a missing handset. Press the key until the handset starts to ring. Once retrieved, press any key on the handset to end paging.
DECT 515 base station

Loudspeaker

New message indicator

When blinking, it indicates that there is a new message.

When fast blinking, it indicates that the answer machine memory is full.

ON/OFF key

Press to switch the answer machine ON or OFF

Play/Stop key

Short press to play new message

Short press to stop a message while listening to it

Paging key

Press to locate all handsets

Conformity, Environment and Safety

Safety information

This equipment is not designed to make emergency calls when the power fails. An alternative has to be made available to allow emergency calls.

Conformity

Hereby, Philips declares that the DECT 511xx and DECT 515xx are in compliance with the essential requirements and other relevant provisions of Directive 1999/5/EC. This product can only be connected to the analogue telephone network of the UK and Ireland.

Power requirements

This product requires an electrical supply of 220-240 volts, alternating monophased power, excluding IT installations defined in standard EN 60-950. In case of power failure, the communication can be lost.

Warning !

The electrical network is classified as hazardous according to criteria in the standard EN 60-950. The only way to power down this product is to unplug the power supply from the electrical outlet. Ensure the electrical outlet is located close to the apparatus and is always easily accessible.

Telephone connection

The voltage on the network is classified as TNV-3 (Telecommunication Network Voltages), as defined in the standard EN 60-950.

Safety precautions

Do not allow the handset to come into contact with water. Do not open the handset or the base station. You could be exposed to high voltages. Do not allow the charging contacts or the battery to come into contact with conductive materials.

Environmental care

Please remember to observe the local regulations regarding the disposal of your packaging materials, exhausted batteries and old phone and where possible promote their recycling.

Declaration of conformity

We
Philips Consumer Electronics
Route d'Angers
72081 Le Mans Cedex 9
France

Declare that the products DECT 511xx and DECT 515xx are in compliance with the Annex III of the R&TTE-Directive 1999/5/EC and then with the following essential requirements:

Article 3.1.a (protection of the health & the safety of the user) : EN 60950-1 (10/2001)

Article 3.1.b (protection requirements with respect to electromagnetic compatibility :
ETSI EN 301 489-6 V1.2.1 (08/2002) & ETSI EN 301 489-1 V1.4.1 (08/2002)

Article 3.2 (effective use of the radio spectrum) EN 301 406 (2003)

The presumption of conformity with essential requirements regarding Council Directive 1999/5/EC is ensured.

Date : 10/05/2004   Le Mans
Quality Manager, Home Communication

Using GAP standard compliance

The GAP standard guarantees that all DECT™ GAP handsets and base stations comply with a minimum operating standard irrespective of their make. Your DECT 511/515 handset and base station are GAP compliant, which means the minimum guaranteed functions are : register a handset, take the line, receive a call and dial. The advanced features may not be available if you use another handset than a DECT 511/515 with your base station.
To register and use your DECT 511/515 handset with a GAP standard base station of a different make, first follow the procedure described in the manufacturer's instructions, then follow the procedure page 28.
To register a handset from another make to the DECT 511/515 base station, place the base station into registration mode (page 28), then follow the procedure in the manufacturer's instructions.

Philips has marked the battery and packaging with standard symbols designed to promote the recycling and appropriate disposal of your eventual waste.

A financial contribution has been paid to the associated national recovery & recycling system.

The labelled packaging material is recyclable.

DECT™ is a Trade Mark of ETSI registered for the benefit of the implementers of the DECT technology.

Installing the DECT 511/515

Unpacking your DECT 511

The DECT 511 package contains:

One DECT 511 base station One DECT 511 handset

NiMh 2HR
AAA 600 mAh
rechargeable
batteries

A user guide

A guarantee

A power supply
A line cord*

Unpacking your DECT 515

The DECT 515 package contains:

One DECT 515 base station One DECT 515 handset

NiMh 2HR
AAA 600 mAh
rechargeable
batteries

A user guide

A guarantee

A power supply

A line cord*

In DECT 511 and DECT 515 multi-handset packs, you will also find one or more additional handsets, chargers with their power supply and additional rechargeable batteries.

***Warning :** You may find in the box the line adaptor delivered separately from the line cable. In this case, please, first plug this line adaptor to the line cable before connecting it to the line socket.

Installing the base station

Situate your product close enough to the telephone and mains power sockets so that the cables will reach. To properly install the base station, plug the line cord and the power cable into the base station. Plug the cord and the cable into the wall. A beep indicates that the phone is properly installed (only available for DECT 515). If you have a broadband DSL Internet Installation, please make sure you have one DSL filter plugged directly on each line socket used in the house and check the modem and the phone are plugged in the correct filter slot (one specific for each).

Warning ! The electrical network is classified as dangerous according to criteria in the standard EN 60-950. The only way to power down this product is to unplug the power supply from the electrical outlet. Ensure the electrical outlet is located close to the apparatus and is always easily accessible.
Please take care that the power supply and telephone line are connected to the correct sockets as incorrect placement could damage your equipment.

Warning ! *Always use the cables provided with the product.*

Do not insert anything in this opening

Connect the power supply

Connect the telephone line cord
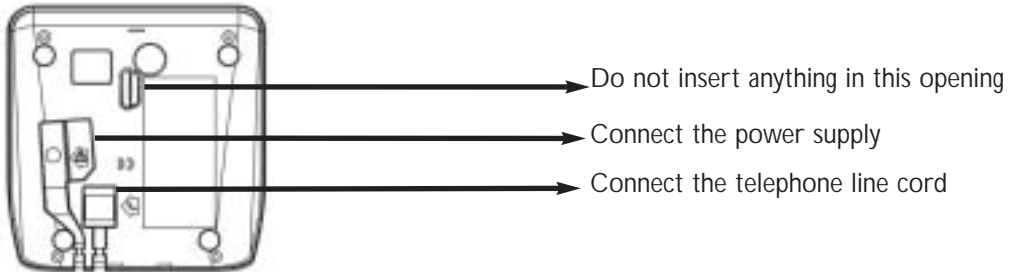

Installing and replacing the batteries in the handset
To insert the batteries, open the battery cover, place the batteries as indicated and put the battery cover back. When the handset is placed on the base station the 3 battery bars scroll (if charge is needed). Allow the handset to charge for 24 hours to reach full charge. On first use it may be necessary to wait for a few minutes before seeing symbols on the display.
In case you need to change the batteries, the following type is mandatory 2HR AAA NiMh 600 mAh.
Warning: the base station must always be plugged into the mains when charging or when in use. Always use rechargeable batteries.

> Batteries should not be disposed of with general household waste.

Battery life and range

Optimal battery life is reached after 3 cycles of complete charge & discharge. When reaching the range limit and the conversation becoming crackly, move closer to the base. To reach optimal range, place the base station away from electrical appliances.

| Battery life in standby mode	Battery life in communication	Indoor range	Outdoor range
up to 200 hours	up to15 hours	up to 50 metres	up to 300 metres

Introduction

Philips screen saver

After 2 minutes of inactivity, the screen saver is displayed:
You can deactivate it (see p.30)

PHILIPS

Idle mode

In idle mode, the DECT 511/515 display shows various information:

- The date & time, the name of the handset and the instructions to access the menu.

- Missed calls ✆, new SMS ✉ or new messages 🖽 (answer machine) or network voicemailbox message ✆✉, if any.

- "Do Not Disturb" mode 🔲 , and the alarm clock 🕐 , if activated.

To activate/deactivate these functions press #°ₐ or ⓞ☒
Understanding the menu system

To access the carousel menu from idle mode, press ✦◀ on the side of the handset The carousel represents a loop of icons that gives access to the different first level menus.

Scroll up or down 🔼🔽 to reach the desired menu and select ✦◀

The sub menus are listed and represented by little squares ☐ at the bottom of the display. To reach one particular sub-menu use the "pilot key" 🔼🔽 and press ✦◀ to validate your choice. A "tick" ☑ shows the selected sub-menu or option. The ◼ shows the option you are browsing.
Note: some menus are also directly accessible via a dedicated key on the keypad like the SMS menu with 📟 or the Intercom with ⓘ.

How to navigate in the menus

Press to access the carousel menu

Scroll to **Sounds,** and select ✦◀

Scroll to **Handset ring tone vol.** and select ✦◀

The current level is heard, browse 🔼🔽 to hear other levels

Browse through the levels and select one ✦◀

In call features

During an external call, some other options are available. Press ✦▪ to enter **Options**.

To mute the handset microphone

✦▪   Press to enter **Options**

✦▪   Press to select **Mute** (the caller can no longer hear you)

✦▪   Press again to resume the conversation (**End mute**)

Intercom (available only if you have at least two handsets)

During an external call, you can use the intercom in-call option to call another handset and for example transfer the call to this handset.

✦▪   Press to enter **Options**

📞   Scroll to **Intercom** (the caller can no longer hear you)

       If there is only one additional handset it rings automatically, otherwise select a handset from the list.

✦▪   Press **Transfer** when the second handset has taken the line.

Other options are available such as **Switch** and **Conference call** (see page 38).

To record a conversation (DECT 515 only)

✦▪   Press to enter **Options**

📞   Scroll to **Record** and select ✦▪

To listen to the conversation, go to the call log menu or the messages list

To switch the handset loudspeaker ON/OFF

       Press 🔊 to activate or deactivate the handset loudspeaker

Warning : Handsfree activation could suddenly increase the volume in the earpiece to a very high level. Make sure the handset is not too close to your ear.

To increase/decrease the handset & earpiece/loudspeaker volume during a call

📞   Scroll up to increase or down to decrease the volume when on line

There are 5 volume levels available. The last setting is stored for the next calls.

To access the phonebook or the call log

Press ✦▪ to enter the options. Scroll to **Phonebook** or **Call log** and select ✦▪

Caller Line identification and Call waiting

If you subscribe to the Call waiting service, a beep in the earpiece informs you of a second incoming call. The name or number of the second caller may be displayed if you also subscribe to Caller Display service. To answer that second call, use ⌫ + ② (according to your network, the code may be different). Please contact your network provider for more details.

Editing systems

Case mode

By default, the first letter of a sentence is in upper case. Use ⌗ to change the case mode:
- all letters in upper case (AB)
- all letters in lower case (ab) or
- the first letter in upper case and the rest of the word in lower case (Ab).

Punctuation and mathematical marks are available through 🔟 and ⌷ while other special characters are also available on ⌷ (see table page 20).

Scroll ◀▶ to move the cursor left or right. Press ⌫ to delete a character ; a long press deletes the whole text.

DECT 511/515 uses two editing systems : Multi-tap and Eatoni®. While editing, a long press on ✶ enables you to switch between the two systems.

The standard multi-tap system

This system allows you to enter the text character by character, pressing the corresponding key as many times as necessary to reach the desired character.

The Eatoni® system is a predicitive editing system designed to help you to write an SMS. A little E in the header helps you to know the mode you are using.

Eatoni® is a word editor that chooses the most probable letter.

The operation of the Eatoni® system is the following:
Press the key that displays the character you want to edit. The character that is most likely to be correct is displayed on the screen. If it does not match the expected letter, press ✶ to display the next most probable character available on the key.

Let's compare Multitap and Eatoni® systems to write "Peter".

To write "Peter" with multi-tap

Press [7] once : P

Press [3] twice : Pe

Press [8] once : Pet

Press [3] twice : Pete

Press [7] three times : Peter

Keypad Keys	Multi-tap Sequence

SMS
- Send new SMS
- Read SMS
- SMS settings

SMS menu is also accessible via the carousel or (sms)

Important information are also available on the SMS leaflet in the box

SMS stands for Short Message Service. To benefit from this service you must subscribe to the Caller Line Identification Service (CLI) together with the SMS service from your network provider. SMS can be exchanged with a phone (mobile or compatible fixed lines) provided the receiver has also subscribed to the CLI & SMS services.

Your DECT 511/515 factory settings correspond to the main national operator. If you wish to send or receive SMS through another service provider you must set the corresponding numbers (see page 27 and the SMS leaflet).

A password can protect your SMS box*, but it is not compulsory.
To send an SMS to the receiver's own SMS box*, you must know his destination box.

Send new SMS

To send an SMS to a phone
Press to directly reach **Send new SMS** and select

Select your SMS box* (only if you have created several SMS boxes). To create a SMS box please refer to **SMS settings** page 25
Enter the password if any and press **OK** (optional)

Enter the phone number directly and press **OK** or press to retrieve the number from the **Phonebook**

Enter the **Destination box*** number (optional), press **OK**.
Note: the destination box is the SMS box of the receiver.

Enter the text and press (see page 19)

Press to select **Send now**, otherwise

if you want to store your SMS, scroll to **Store** and select .
The SMS stored can be later retrieved from **Read SMS**
The sent SMS can be up to a maximum of 160 characters long. The special characters ¤,] and [count for 2. The DECT 511/515 can store 25 SMS for the 3 boxes*.

Read SMS

The SMS list contains the stored and received SMS.
The received SMS are shown by ⬅️✉ and the stored SMS are shown ✉.

To read an SMS/to view the number

Press to directly reach **Send new SMS**

Scroll to **Read SMS** and select ➕📶

Select your SMS box* (only if you have created several SMS boxes).
To create a SMS box please refer to **SMS settings** page 25

Enter the password if any and press ➕📶**OK** (optional)

Browse the list of SMS and select ➕📶

Press to select **Read SMS**

or scroll to **View number** and select ➕📶
When reading the list of received SMS, some options are only available for SMS received from a phone.
Those options are **Reply**, **Forward**, **Copy to phonebook, Call** and **View number**. The options **Reply** and **Copy to phonebook** use the sender's own sub-address.

To save a ring tone   only available in the UK

This option enables to save a downloaded ring tone in your handset or in your base station (only available for DECT 515 base station) received through an SMS. This saved ring tone will be then inserted in the menu **Sounds** in the list of **My ring tones** (see p. 50).

Press to directly reach **Send new SMS**

Scroll to **Read SMS** and select ➕📶

Select your SMS box* (only if you have created several SMS boxes).
To create a SMS box please refer to **SMS settings** page 25
Enter the password if any and press ➕📶**OK** (optional)

Browse the list of SMS and select ➕📶 the SMS containing the ring tone

Press to select **Read SMS**

Press to select **Save ring tone**

Handset
- ☐ Babysit mode
- ☐ Registration
- ☐ Rename handset
- ☐ Date & time
- ☐ Display contrast
- ☐ Backlight
- ☐ Screen saver

Babysit mode   *if there are at least 2 handsets*

This feature allows you to monitor the baby's room. Place the handset in the room to be monitored and you will hear the noise coming from the room on the additional handset.

To activate/deactivate the babysit mode

Press to enter the carousel menu

Scroll to **Handset** and select

Press to select **Babysit mode**

Select **ON** or scroll to **OFF** and select

An intercom is necessary to monitor the room (see page 38).
Note: during an intercom, you can still answer a call or make a call with the handset

Registration

Up to 6 handsets can be registered to the base station. 1 handset can be registered to 4 base stations.
Warning: If you wish to associate non Philips handsets to the DECT 511 or DECT 515 base station, make sure that this handset is GAP compliant otherwise it will not operate properly (see p 13).

To register a handset

Unplug and plug back in the mains lead to put the base in registration mode

With the additional handset, press to start the registration

Enter the 4-digit RC code written on the sticker placed under the base station and press **OK**
To unregister a handset

Press to enter the carousel menu

Scroll to **Handset** and select

Scroll to **Registration** and select

Scroll to **Un-register handset** and select

Choose the handset to un-register from the list and press **OK**

Enter the 4-digit RC code and press **OK**

Note: should you have your handset serviced alone, please make sure it is unregistered from the base station before taking it back to the repair centre.

To select a base station

Each DECT 511/515 handset can be used with up to 4 base stations.
To use a handset with another base station, the handset must be first registered to that base station.

Press to enter the carousel menu

Scroll to **Handset** and select

Scroll to **Registration** and select

Scroll to **Base selection** and select

Choose the base from the list and press **OK**

Warning:*the handset will automatically operate with the last base station to which it was registered. If the handset is out of range, it will automatically search for another base station from the list.*

Rename handset

To rename a handset

Press to enter the carousel menu

Scroll to **Handset** and select

Scroll to **Rename handset** and select
Long press to delete the current name

Enter the name and press **OK**
Date & time

To set the date and time

Press to enter the carousel menu

Scroll to **Handset** and select

Scroll to **Date & time** and select

Select **Set date**

Enter the current date and press **OK**

Scroll to **Set time** and select

Enter the current time and press **OK**
Warning: If your phone is connected to an ISDN line through an adaptor, the date & time may change after each call. Please check the date & time settings in your ISDN system. Please contact your network provider (see FAQ p.56).

Display contrast

To set the display contrast

Press to enter the carousel menu

Scroll to **Handset** and select

Scroll to **Display contrast** and select

Browse through the levels and select the appropriate one
Backlight

To set the display backlight duration or deactivate it

Press to enter the carousel menu

Scroll to **Handset** and select

Scroll to **Backlight** and select

Browse through the durations OFF / 10 seconds / 20 seconds
and select
Screen saver

After 2 minutes of inactivity, the screen saver is displayed. You can choose to activate or deactivate it

To activate or deactivate the screen saver

Press to enter the carousel menu

Scroll to **Handset** and select

Scroll to **Screen saver** and select

Press to select **ON** or scroll to **OFF** and select

Answer machine

- ☐ Saved messages
- ☐ Record a memo
- ☐ Outgoing messages
- ☐ Answerphone settings

The DECT 515 includes an answer machine that records the calls when it is activated. You can reach the answer machine from the base station or the handset.

By default, the answer machine is activated. It can store up to 25 messages within the maximum recording time of 30 minutes. A message can be up to 3 minutes long.

To switch the DECT 515 Telephone Answer Machine ON/OFF

From the handset

Press to enter the carousel menu

Scroll to **Answer machine** and select ➡️📶

Scroll to **Answphone settings** and select ➡️📶

Press to select **Mode**

Press to select **ON** or scroll to 📶 **OFF** and select ➡️📶
From the base station

A press on ⌨️ activates or deactivates the answer machine. Once activated, the red indicator is lit.

Saved messages

You can listen to new or saved messages via the handset or the base station.

To listen to new message(s) via the handset

The display shows that there is 1 or more new messages(s) (**1** ✉️).

Press ➡️📶 to view.
The message is automatically played.
Note: the entry shows the number of times the caller tried to reach you. If you have subscribed to the Caller Identification Service (CLI), the display shows the name of the caller and its group if activated (see page 39).

To play and browse through saved message(s) via the handset

Press to enter the carousel menu

Scroll to **Answer machine** and select ♦◀

Select **Saved messages**, the message which
was recorded first is automatically played

Press ♦◀ to access the **Options**

Press to select **Play**

To go to next or previous messages, scroll to **Next message** or

Previous message and select ♦◀
Note: you can listen to the message(s) via the Call log. Scroll up to access Call log and scroll to choose the message from the call log list. The entry is marked ♦▦ .

To play and go to next saved message(s) via the base station

Press to play a message and press once again to stop a message while listening

Press to go to the next message while listening. Make a long press to fast forward the messages while listening

To delete a message via the handset

Press to enter the carousel menu

Scroll to **Answer machine** and select ♦◀

Select **Saved messages**, the message which
was recorded first is automatically played

Press ♦◀ to access the **Options**

Scroll to **Delete** and select ♦◀

Press ♦◀**OK** to confirm

To delete a message via the base station

Press ⊗ to delete the current message.
Make a long press to delete all the messages (except unread ones)

The other options available from the handset are **Call** (if number is displayed), **Store** (if number is displayed) and **Send SMS** (if number is displayed).

Answer machine

Settings

To select the answer mode and the outgoing message (OGM) type

You can select among 2 answer modes : Answer only (when no messages can be left) and Answer & record (when messages can be left). For each mode, 2 outgoing message types are available: predefined or personal message. By default the answer machine is set to Answer & Record with predefined OGM.

Press to enter the carousel menu

Scroll to **Answer machine** and select

Scroll to **Outgoing Messages** and select

Select **Answ. machine mode**

Choose the appropriate mode among the 4 options above (2 answer modes and 2 outgoing message types) and select

Note: a predefined message cannot be deleted

To record your personal outgoing message (OGM)

You can record 5 different personal OGM: a specific personal OGM for Answer & record mode for each group (A, B or C), the standard OGM for Answer & record mode for normal callers (not belonging to any group) and the standard OGM for Answer only mode for all callers. It is possible to record specific messages for specific groups only if you subscribe to the Caller Line Identification service (CLI) and if you have set the groups in the phonebook (see page 41).
You can also download outgoing messages through an online service (see Leaflet "Download of ring tones and answerphone messages")*.

Press to enter the carousel menu

Scroll to **Answer machine** and select

Scroll to **Outgoing Messages** and select

Scroll to **Record outgg msg** and select

Choose between the different type of OGMs and the various groups and press

Scroll to **Record new** and select

Press to start recording and once again to stop recording

Answer machine   **33**

clean

Scroll to **Record outgg msg** and select

Choose between the different type of OGMs and the various groups and press

Scroll to **Record new** and select

Press to start recording and once again to stop recording

Answer machine   **33**

The message is automatically played back. You can delete and/or record it again. The personal message can be up to 1 minute long

Note: Select **Standard OGM for answer only mode** or **Standard OGM for Answ. & Record mode** if you have no CLI subscription.

Warning: Please make sure that you have selected the appropriate answering machine mode (refer to page 33 "**To select the answer mode and the outgoing message type**")

To set the number of rings before answering

You can set the answer machine to start playing the outgoing message after a given number of rings (3, 5, 7 or Toll saver). The toll saver option (activated by default) is useful when using the remote access. The answer machine will start playing the outgoing message after 3 rings if there are new messages. If there is no new message the outgoing message will be played after 5 rings. Hang up after the 4th ring if you want to check if you have any messages at no cost.

Press to enter the carousel menu

Scroll to **Answer machine** and select

Scroll to **Answphone settings** and select

Scroll to **Number of rings before answering** and select

Choose between **Toll saver**, **3 rings**, **5 rings** or **7 rings** and select
To set the voice language

You can change the language of the predefined message (OGM).

Press to enter the carousel menu

Scroll to **Answer machine** and select

Scroll to **Answphone settings** and select

Scroll to **Voice language** and select

Choose the appropriate language among the list and select

To set the call screening

This feature allows you to activate or deactivate the base station loudspeaker so that you can choose whether to hear or not the callers leaving a message.
You can set permanent call screening on the base station.

Press to enter the carousel menu

Scroll to **Answer machine** and select

Scroll to **Answphone settings** and select

Scroll to **Call screening** and select

Press to select **Off** or scroll to Low, **Medium, High** or **Boost** and select

Answphone settings
Call screening
☐☐☐●☐☐

Note: this feature is activated by default on Medium level.

Call screening "call by call" on the handset is also possible. While the caller is leaving a message, press to listen and press again to stop listening. Adjust the volume with .

To set the recording quality

There are 2 recording qualities: standard and high. In standard quality the total capacity is 30 minutes and in high quality the capacity is up to 15 minutes.

Press to enter the carousel menu

Scroll to **Answer machine** and select

Scroll to **Answphone settings** and select

Scroll to **Recording quality** and select

Choose between **High** or **Standard** and select

To activate and deactivate the remote control

Press to enter the carousel menu

Scroll to **Answer machine** and select

Scroll to **Answphone settings** and select

Scroll to **Remote control** and select

Select **Mode**

Press to select **ON** or scroll to OFF and select

Answphone settings
Remote control
☐☐☐☐☐●
Note: the default setting is OFF. Activate this feature if you want to be able to remotely use the answer machine.

To remotely control your answer machine

To remotely access your answer machine :
- from another phone dial home
- if your answer machine is on, during or after the message press the star ✳ key on the handset ; if your answer machine is off, you will hear a beep after 45 seconds, then press the star ✳ key
- dial your remote control code (the default code is the registration code RC)
- if you have new messages they will be automatically played.

The following table indicates the features available when remotely accessing the answer machine.

Record memo	dial ⓪	Delete	dial ⑥
Play previous message	dial ①	Activate answer machine	dial ⑦
Play message	dial ②	Stop	dial ⑧
Play next message	dial ③	Deactivate	dial ⑨
Listen again	dial ⑤		

To change the remote control code

The default code is the registration code. We advise you to personalize it.

Press to enter the carousel menu

Scroll to **Answer machine** and select ➡•
Scroll to **Answphone settings** and select ➡•

Scroll to **Remote control** and select ➡•

Scroll to **Change code** and select ➡•

Delete the default code, enter your new remote control code and press ➡•**OK**
Record and listen to a memo

This feature allows you to leave local messages for your family on the answer machine.
A memo is recorded from the handset, it is represented by ⊞ in the call log and can last up to 3 minutes.

To record a memo

Press to enter the carousel menu

Scroll to **Answer machine** and select ➕

Scroll to **Record a memo** and select ➕

Press to start recording and once again to stop
To listen to a new memo

The display shows there is 1 new local message (**1** ⊞). Press ➕ to **View**. The message is automatically played. **Delete** is also available in the options (see page 32)

To listen to a saved memo

You can use the **Answer machine** sub menu **Saved messages** and select **Play** or listen to a new or a saved memo through the base station (see page 32).

Intercom

- ☐ Call all
- ☐ *Handset list*

Intercom menu is accessible via the carousel or 🔘

Using the Intercom (if there are at least 2 handsets)

This feature allows you to make free internal calls, transfer external calls from one handset to another, use the conference option and the babysit feature (room monitoring).

Internal call

🔘 Press to call the selected handset + handset number (for example 🔢)

📞 Hang up

Note: If the handset does not belong to the Philips DECT 511/515 range, this function may not be available.

Fast call transfer when on line

During a call you can transfer the call without waiting for the other handset to pick up. All the handsets will then ring.

🔘 Press to call the other handset

📞 Hang up

Note: the person on hold hears music. A press on 🔘 allows you to switch between the 2 calls.

Call transfer to a specific handset when on line

During a call you can transfer the call to a specific handset.

🔘 Press to call the selected handset + handset number (for example 🔢)

📞 Hang up

Note: the person on hold hears music. A press on 🔘 allows you to switch between the 2 calls.

Call transfer via the in-call options

During a call you can transfer the call via the in call options.

Press to enter the options (with handset 1).

Scroll to **Intercom** and select

If there is only one additional handset, it rings automatically. Otherwise:

Browse through the handset list and select the one you want to transfer the call to

http://www.philips.com/faqs/dect

The called handset rings. The external call is put on hold. If there is no answer from the called handset you can resume the call on the first handset.

Take the line on the called handset, both internal callers can talk

Press to select **Transfer** (with handset 1)

Scroll to **Switch** and come back to the external caller

Note: to answer the call on the second handset you can press ⌖.

Conference call via the in-call options

Conference call allows one external call to be shared with two handsets (in intercom). The 3 people can share the conversation. No operator subscription is needed.

Press to enter the options (with handset 1)

Scroll to **Intercom** and select ◆◀

If there is only one additional handset, it rings automatically. Otherwise:

Browse through the handset list and select ◆◀ the one you want to call.
The called handset rings. The external call is put on hold. If there is no answer from the called handset you can resume the call on the first handset.

Take the line on the called handset, both internal callers can talk

Scroll to the **Conference call** option and select ◆◀.
The 3 people can share the conversation.

Note: to answer the call on the second handset you can press ⌖.

To initiate the babysit (room monitoring) if there are at least two handsets

To use the babysit mode feature you need to activate it (see page 28) & initiate an intercom. Place the handset in the room to be monitored and you will hear the noise coming from the room on the additional handset.

Press to enter the options

Scroll to **Intercom** and select ◆◀

If there is only one additional handset, it rings automatically. Otherwise:

Browse through the handset list and select ◆◀ the one you want to call. The called handset rings.

Take the line on the called handset, the room monitoring can start.

📖 Phonebook

☐ Add new
☐ View

Phonebook menu is accessible via the carousel or 📞📶

65 names and numbers can be stored in the phonebook.
The phonebook contains all the information related to the callers, especially the group settings. The names and numbers are shared with all the handsets registered to your base.

Group settings

There are 3 groups (group A, group B and group C). When ringing, the ring tone helps you identify the caller's group (see p.49) and the screen shows the caller's name. A subscription to the Caller Line identification is needed.

Add new

The names are stored in alphabetical order.

Service code settings

When you subscribe to extra services with your operator you may need to set some codes in your phone. The default codes are the codes used by the main national operator.
If you subscribed to another operator you may need to change the codes.
Contact your network operator for more information on the services.

Press to enter the carousel menu

Scroll to **Base station** and select

Scroll to **Service code settings** and select

Browse the list of services and select

Enter the code and press **OK**

FAQ
1/ I have no dialling tone after having installed my phone. How do I solve this problem?
Check that you have connected your phone using the supplied line cable and not the one from any previous phone (they are often wired differently).
Check that you have fully charged the handset according to the instructions given for the phone.
Check that the aerial icon (radio link with the base station) is displayed. If the handset is not registered you may need to register it (see p.28).

2/ Can the handset be left on the base all the time?
Yes there is no "memory effect". The handset can be left on the base station for all current models using NiMh batteries.

3/ Will my phone lose all recorded data (phonebooks entries, recorded messages) in the case of a general power cut?
No it will not. The data recorded in your phone is not deleted in the case of a general power failure or when you unplug your base station or when you replace the batteries.

4/ I have set up the date & time on my phone and the information given after a call is not correct. Why?
If you have a ISDN phone installation, these parameters (date & time) may be transferred directly through the ISDN to the phone. If you did not set-up the ISDN correctly this can explain why the information transmitted is not correct. Set-up the date & time directly on the ISDN phone installation or, if this is not possible, call the Operator/dealer who provided and installed the ISDN.

5/ I cannot use the answering machine of my Philips phone together with my Fax plugged into the same line, why is this?
To avoid this, it is recommended to set up the number of rings before the answering machine switches on. Example: if the network mail box or a fax is set to answer the calls after 4 rings, please set up your answering machine on 3 rings. To set up the number of rings, please see p 34.

6/ What is CLI and how do I make it work?
CLI stands for Caller Line Identification and it is a special service that you may subscribe to from your network operator. Once you have subscribed to the service, a CLI enabled phone will display the callers number (unless withheld) as the phone rings so that you may decide whether or not to take the call.

7/ The CLI service does not work on my Philips phone, on my digital phone installation (ISDN, ADSL). How do I solve this problem?
Our products are designed to work on an analogue network. If you plugged your PHILIPS phone into a digital installation, the CLI may not be displayed upon incoming calls. Digital phone installations (ISDN) are not always compatible with analogue phones as far as operator services are concerned.
You may find the information regarding compatibility in the user guide of your ISDN. If not, please contact the ISDN manufacturer to check if the device is designed to display CLI on analogue phones. ISDN over 2 or 3 years old are generally not compatible with analogue phones for the CLI Service.

Note that the filters used with some ADSL lines can filter out part of the CLI signal and prevent the phone from displaying CLI correctly. It is possible to purchase better ADSL filters that do not cause this problem.

http://www.philips.com/faqs/dect

8/ What is CNIP (Caller Name Identification)?
As with the CLI service this new feature is dependent on the Network and it has to be activated by your Operator (by subscription). It will allow you to have the name of the caller displayed upon an incoming call. This service may not be available from all Operators yet. We advise you to check with your Operator.
NB. If the name of the caller is registered in your phonebook upon an incoming call it will be the name you have registered which will be displayed and not the one provided by the Operator. The data in your phonebook will have priority over the Operator's data in this particular case.
The CNIP uses the same technology as for the CLI. Therefore the limits of this service are identical (please refer to the questions related to CLI if the service is not working properly). Remember that it only works with alphanumeric display.

9/ How many telephones can I have?
All items of telephone equipment have Ringtone Equivalence Number* (REN), which is used to calculate the number of items which may be connected to any one telephone line.
Your DECT 511/515 has a REN of 1. A total REN of 4 is allowed, if the total REN of 4 is exceeded, the telephones may not ring.
With different telephone types there is no guarantee of ringing, even when the REN is less than 4.

10/ My answering machine does not record the messages left by my correspondents. How do I solve this problem?
Check the operator voice mail box is not activated. If it is activated, set the answering machine so that it starts recording first (set up the number of rings before the answering machine switches on).

11/ Which are the conditions required to be able to send an SMS ?
You must first have a subscription to Caller Display (CLI) service from your network operator as well as an SMS service subscription from the appropriate provider.

12/ Is it possible to write, read send or receive an SMS when the other handset is in communication (DECT 511 and DECT 515 multi-handset packs only)?
No it is not possible.

13/ What happens if I send an SMS to a fixed line with no SMS phone ?
The correspondent could receive a vocal message (SMS provider dependent).

14/ Is it possible to send an SMS to a fixed line in another country ?
This feature depends on your provider. Please contact your provider for more details.

15/ How can I get the SMS centre number ?
One SMS centre number at least is pre-programmed in your DECT 511/DECT 515. However, should you need to store another number, other numbers can be set into the phone from the menu **SMS/SMS Settings/SMS centre**. Please check the incoming and outgoing centre numbers with the SMS provider or from the enclosed addendum to your phone user manual.

16/ What is the destination box* useful for ?
This is the number of a personal SMS box. It is a way to send an SMS to someone's personal box instead of sending it to the default box, which is a kind of common box. If you send an SMS without specifying an SMS box number (destination box), then the SMS will be sent to the default box if the receiver's phone deals with multi-boxes features (provider dependent).

17/ When using my SMS-enabled Philips phone with another SMS-enabled phone on the same line, can it cause any problems ?
Yes, this will prevent the phones from receiving SMS. You need to deactivate the SMS feature on one of the phones. Your DECT 511/DECT 515 has a feature which enables you to turn the SMS feature off. Go to menu **SMS/SMS Settings/Mode/0FF**

INFORMATION ON TEXT MESSAGING (SMS) IN EIRE

You must first subscribe to your network provider's Caller Display service.
Example : call EIRCOM free 1901.

WARNING ! Change the operator type in your phone :
Go to **Base station** menu and select **Line Settings** sub menu.
Select the **Choose country/oper.** sub menu and choose the appropriate setting among the list (for example: Eircom).
Please refer to your phone user manual.

The network SMS centre numbers are automatically set in your phone on SMS
Centre 1:
Send SMS service number (Outgoing number) : 1740 9900
Receive SMS service number (Incoming number) : 0818 365 135
Contact your network provider for more information.

Registration to SMS service is done by sending your first SMS.

There is a charge for sending SMS text messages (contact your network provider for more information).

REMINDER ! If there are two **SMS- enabled** phones on your telephone line, you will have to deactivate the SMS feature on one of the devices.

SMS and Caller Display subscription : The way to subscribe to and to connect to the Short Message Service (SMS) as well as the SMS function may be operator dependent and may vary in time. Please contact your network operator for more information. The following information is believed to be exact at the time of writing. It is provided for guidance only and does not guarantee accuracy over time.

SMS and Caller Display disclaimer : The Short Message Service and Caller Display features of your telephone terminal are network operator dependent. The terminal can provide them only if the network offers such features and if the user has subscribed to these features. Your phone has been carefully developed and tested according to the latest version of the SMS and CLI standards, and is up to date at the time of product release. However, Philips cannot take any responsibility and cannot guarantee the interoperability with the operator's network in case of standard modification, network modification and/or of incomplete or inaccurate implementation of the standard by the network's operator.

Text messaging in the UK see overleaf   C E   Printed in Romania   **3111 285 22232**

INFORMATION ON TEXT MESSAGING (SMS) IN THE UK

You must first subscribe to your network provider's Caller Display service.

Registration to the SMS service is done by sending your first SMS.

There is a charge for sending SMS text messages (Contact your network operator for more information).

By default, your phone is set with the SMS centre 1 (British Telecom).
If you change this setting, the SMS service may not work.

SENDING SMS FROM A FIXED LINE TO A FIXED LINE : follow instructions in the user guide.

SENDING SMS FROM A FIXED LINE TO A MOBILE : follow instructions in the user guide.
Warning : When sending an SMS to a mobile phone, do not enter any destination box as your SMS will not be delivered.

USING DESTINATION BOX ON YOUR PHONE (not available on DECT 311) :
In order to receive an SMS in a specific SMS box, you must have previously sent at least one SMS from this box.

REMINDER ! If there are two **SMS- enabled** phones on your telephone line, you will have to deactivate the SMS feature on one of the devices.

<u>**SMS and Caller Display subscription**</u> : The way to subscribe to and to connect to the Short Message Service (SMS) as well as the SMS function may be operator dependent, and may vary in time. Please contact British Telecom for more information. The following information is believed to be exact at the time of writing. It is provided for guidance only and does not guarantee accuracy over time.

<u>**SMS and Caller Display disclaimer**</u> : The Short Message Service and Caller Display features of the telephone terminal are network operator dependent. The terminal can provide them only if the network offers such features and if the user has subscribed to these features. Your phone has been carefully developed and tested according to the latest version of the SMS and CLI standards, and is up to date at the time of product release. However, Philips cannot take any responsibility and cannot guarantee the interoperability with the operator's network in case of standard modification, network modification and/or of incomplete or inaccurate implementation of the standard by the network's operator.

The download of ring tones and outgoing messages (only available in the UK and depending on the network technical availability)

To personalise your cordless telephone, there is nothing better than a melody and a message of your choice! Simply call 0906 666 0788 and that's it!

The download of ring tones

First of all you must subscribe to the SMS function with your network provider **(see SMS leaflet)**.

Just call 0906 666 0788 and follow the instructions!

You have chosen your ring tone? You are about to receive it by SMS. Then you will be able to download it on your telephone (see "**SMS**" chapter in the user manual, part "**Read SMS**/**To save a ring tone**"). Be careful, only three downloaded ring tones can be saved! If you wish to download another ring tone, you will have to delete one of them from "My ring tones" list (see "**SOUNDS**" chapter in the user manual, part "**My ring tones/To delete a ring tone**").

The download of outgoing messages (only available on DECT phones with answer machines).

By default, your answer machine is switched on. You have to change its settings to the "Answer and Record with personalised OGM" mode (refer to "**ANSWER MACHINE**" chapter in the user manual, part "**Settings/To record your personal outgoing message**"). These two conditions are necessary to receive your message. Be careful! On the "Answer and Record with personalised OGM" mode, recording a new message will automatically delete the previous one. Before downloading an outgoing message, make sure your answer machine is not full.

Keep in mind your Remote Control code (RC) written under your base station (see the "**ANSWER MACHINE**" chapter in the user manual, part "**Settings/To change the remote control code**").

Just call 0906 666 0788 and follow the instructions!

Remember to free the line. Do not answer the next call and wait for your answer machine to record the message.

You can choose to welcome all the callers with this message or only the group of your choice. In this case, you must previously subscribe to the Caller Display Service offered by your network provider.
