CHILD SAFETY:

It Makes A Difference How and Where You Use Your Flat Panel Display

Congratulations on your purchase! As you enjoy your new product, please keep these safety tips in mind:

The Issue

- The home theater entertainment experience is a growing trend and larger flat panel displays are popular purchases. However, flat panel displays are not always supported on the proper stands or installed according to the manufacturer's recommendations.

- Flat panel displays that are inappropriately situated on dressers, bookcases, shelves, desks, speakers, chests, or carts may fall over and cause injury.

TOSHIBA Cares!

- The consumer electronics industry is committed to making home entertainment enjoyable and safe.

Tune Into Safety

- One size does NOT fit all. Follow the manufacturer's recommendations for the safe installation and use of your flat panel display.
- Carefully read and understand all enclosed instructions for proper use of this product.
- Don't allow children to climb on or play with furniture and television sets.
- Don't place flat panel displays on furniture that can easily be used as steps, such as a chest of drawers.
- Remember that children can become excited while watching a program, especially on a "larger than life" flat panel display. Care should be taken to place or install the display where it cannot be pushed, pulled over, or knocked down.
- Care should be taken to route all cords and cables connected to the flat panel display so that they cannot be pulled or grabbed by curious children.

Wall Mounting: If you decide to wall mount your flat panel display, always:

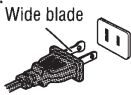

- Use a mount that has been recommended by the display manufacturer and/or listed by an independent laboratory (such as UL, CSA, ETL).
- Follow all instructions supplied by the display and wall mount manufacturers.
- If you have any doubts about your ability to safely install your flat panel display, contact your retailer about professional installation.
- Make sure that the wall where you are mounting the display is appropriate. Some wall mounts are not designed to be mounted to walls with steel studs or old cinder block construction. If you are unsure, contact a professional installer.
- A minimum of two people are required for installation. Flat panel displays can be heavy.

Installation

Follow these recommendations and precautions and heed all warnings when installing your TV:

- 19)  **WARNING: NEVER expose batteries to excessive heat such as sunshine, fire, or the like.**
- 20) ALWAYS plug the product into an outlet that is located in such a manner that it can be easily unplugged in case the product requires service. The mains plug is used as the disconnect device.
- 21) NEVER route the product's power cord inside a wall or similar enclosed area.
- 22) Never modify this equipment. Changes or modifications may void: a) the warranty, and b) the user's authority to operate this equipment under the rules of the Federal Communications Commission.

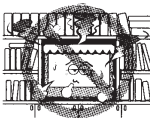

- 23)  **DANGER: RISK OF SERIOUS PERSONAL INJURY, DEATH, OR EQUIPMENT DAMAGE!**

Never place the TV on an unstable cart, stand, or table. The TV may fall, causing serious personal injury, death, or serious damage to the TV.

- 24) To avoid damage to this product, never place or store the TV in direct sunlight; hot, humid areas; or areas subject to excessive dust or vibration.
- 25) Always place the TV on the floor or a sturdy, level, stable surface that can support the weight of the unit. To secure the TV, use a sturdy strap from the hook(s) on the rear of the TV to a wall stud, pillar, or other immovable structure. Make sure the strap is tight, secure, and parallel to the floor.

- 26) The apparatus should not be exposed to dripping or splashing. Objects filled with liquids should not be placed on the apparatus.
- 27) Never block or cover the slots or openings in the TV cabinet back, bottom, and sides. Never place the TV:
 - On a bed, sofa, rug, or similar surface;
 - Too close to drapes, curtains, or walls; or
 - In a confined space such as a bookcase, built-in cabinet, or any other place with poor ventilation.The slots and openings are provided to protect the TV from overheating and to help maintain reliable operation of the TV. Leave a space of at least 4 (four) inches around the TV.
- 28) Always place the back of the television at least four (4) inches away from any vertical surface (such as a wall) to allow proper ventilation.

Care

For better performance and safer operation of your TOSHIBA TV, follow these recommendations and precautions:

- 34) If you use the TV in a room whose temperature is 32 °F (0 °C) or below, the picture brightness may vary until the LCD warms up. This is not a sign of malfunction.
- 35) Always unplug the TV before cleaning. Gently wipe the display panel surface (the TV screen) using a dry, soft cloth (cotton, flannel, etc.). A hard cloth may damage the surface of the panel. Avoid contact with alcohol, thinner, benzene, acidic or alkaline solvent cleaners, abrasive cleaners, or chemical cloths, which may damage the surface. Never spray volatile compounds such as insecticide on the cabinet. Such products may damage or discolor the cabinet.

- 36)  **WARNING: RISK OF ELECTRIC SHOCK!** 

Never spill liquids or push objects of any kind into the TV cabinet slots.

- 37) While it is thundering, do not touch the connecting cables or apparatus.
- 38) For added protection of your TV from lightning and power surges,

always unplug the power cord and disconnect the antenna from the TV if you leave the TV unattended or unused for long periods of time.

- 39) ALWAYS unplug the TV to completely disconnect from mains power. When the TV is turned off using the on/off switch, it is not completely disconnected from power and a minute amount of current is still consumed.
- 40) During normal use, the TV may make occasional snapping or popping sounds. This is normal, especially when the unit is being turned on or off. If these sounds become frequent or continuous, unplug the power cord and contact a Toshiba Authorized Service Provider.

- 41)  **DANGER: RISK OF SERIOUS PERSONAL INJURY OR DEATH!**
Never strike the screen with a sharp or heavy object. 

- 42) • The LCD screen of this product can be damaged by ultraviolet radiation from the sun. When selecting a location for the television, avoid locations where the screen may be exposed to direct sunlight, such as in front of a window.
• Never touch, press, or place anything on the LCD screen. These actions will damage the LCD screen. If you need to clean the LCD screen, follow the instructions in item 35 on page 2.

Service

- 43)  **WARNING: RISK OF ELECTRIC SHOCK!** 
Never attempt to service the TV yourself. Opening and removing the covers may expose you to dangerous voltage or other hazards. Failure to follow this WARNING may result in death or serious injury. Refer all servicing not specified in this Easy Setup Guide to a Toshiba Authorized Service Provider.

- 44) If you have the TV serviced:
• Ask the service technician to use only replacement parts specified by the manufacturer.
• Upon completion of service, ask the service technician to perform routine safety checks to determine that the TV is in safe operating condition.

- 45) The cold cathode fluorescent lamp in the LCD panel contains a small amount of mercury.
When the TV reaches the end of its useful life, dispose of the used TV by the approved method for your area, or ask a qualified service technician to properly dispose of the TV.

 **Note:** The lamp(s) inside this product contain mercury. Disposal may be regulated due to environmental considerations. For disposal or recycling information, contact your local authorities or the Electronics Industries Alliance (www.eiae.org).

Important notes about your LCD TV

The following symptoms are technical limitations of LCD Display technology and are not an indication of malfunction; therefore, Toshiba is not responsible for perceived issues resulting from these symptoms.

- 1) An afterimage (ghost) may appear on the screen if a fixed, non-moving image is displayed for a long period of time. The afterimage is not permanent and will disappear in a short period of time.
- 2) The LCD panel contained in this TV is manufactured using an extremely high level of precision technology; however, there may be an occasional pixel (dot of light) that does not operate properly (does not light, remains constantly lit, etc.). This is a structural property of LCD technology, is not a sign of malfunction, and is not covered under your warranty. Such pixels are not visible when the picture is viewed from a normal viewing distance.

Note: Interactive video games that involve shooting a "gun" type of joystick at an on-screen target may not work with this TV.

HDTV Quick Set-Up Guide (For US customers)

⚠ WARNING: The Owner's Manual contains important safety precautions not included in this Guide, please review completely prior to using this product.
Congratulations on the purchase of your new Toshiba High-Definition Television. You must have an HD Signal to watch an HD Picture!

Getting HDTV is easy as 1, 2, 3.

There are 3 basic ways to receive an HDTV Signal on your new High-Definition TV:

1 Over-The-Air (Antenna)

Connect a high quality outside antenna (not supplied) directly to the antenna input on the TV. (reception cannot be guaranteed and is based on proximity to the local signal)

Additional HDTV Antenna Reference Information can be obtained from www.antennaweb.org

2 Cable or Phone Company HDTV Service

Cable or Phone Company HDTV Service Customers will need to subscribe to High-Definition Service from your local provider. (Additional monthly subscription cost may apply)

Digital Cable or Digital Satellite is not HDTV. The picture quality is superior to standard analog cable, but it is not HDTV! See the difference HD Programming makes!

3 SATELLITE

Satellite Customers will need a High-Definition satellite receiver and appropriate dish hardware. (Additional monthly subscription cost may apply)

Once you have a High-Definition Signal you need to connect it to a High-Definition Input on your TV.

If you are connecting directly from an antenna or basic cable.

If you are using an HD Cable Box or HD Satellite Box, there are 3 standard connections that can be used to receive an HD signal.

1 Antenna Input

To connect directly from an antenna or basic cable. Connect the cable directly to the antenna input on the back of the TV.

2 HDMI® to HDMI®

HDMI® is the best connection for HDTV. This is a digital connection that carries both digital video and digital audio.

3 DVI to HDMI®

Your HD Cable Box or HD Satellite Receiver may have a DVI connection. This will be connected to the HDMI® jack on the TV using an HDMI® cable and an HDMI® to DVI converter. DVI carries digital video only. Therefore, this will require a separate analog audio connection as well. (use the red and white audio connections)

4 Component Video Input

ColorStream® HD Component may also be used to receive HDTV. Use if no HDMI® or DVI Jack is available. There are 3 jacks color-coded with Red-Green-Blue on the back of the TV and HD Cable Box or HD Satellite Receiver. This connection will require a separate analog audio connection. (use the red and white audio connections)

Now that you have HD Programming and are connected to an HD Input, Tune to an HD Channel (Remember not all channels are currently broadcast in HD) Sit back, relax and enjoy the superior quality of High-Definition.
Note: Standard analog TV channels and HD channels, even on the same network, broadcast on different channels. Example: ABC analog may be on channel 4, while ABC-HD may be on channel 104.

If you are experiencing problems please call Toshiba Customer Service at 1-800-631-3811

All cables and Adapters are sold separately.

For additional Toshiba Product Information visit support.toshiba.com. Please remember to complete your product registration. Failure to register your product does not diminish your warranty rights.
