NXP 74ABT08 Electronic component datasheet

http://www.manuallib.com/nxp/74abt08-electronic-component-datasheet.html

The 74ABT08 high-performance BiCMOS device combines low static and dynamic power dissipation with high speed and high output drive.

The 74ABT08 is a quad 2-input AND gate.

ManualLib.com collects and classifies the global product instrunction manuals to help users access anytime and anywhere, helping users make better use of products.

74ABT08

Quad 2-input AND gate Rev. 2 — 14 March 2014

Product data sheet

General description

The 74ABT08 high-performance BiCMOS device combines low static and dynamic power dissipation with high speed and high output drive.

The 74ABT08 is a quad 2-input AND gate.

Features and benefits 2.

- Latch-up protection exceeds 500 mA per JESD78B class II level A
- ESD protection:
 - ♦ HBM JESD22-A114F exceeds 2000 V
 - MM JESD22-A115-A exceeds 200 V
- Multiple package options
- Specified from -40 °C to +85 °C

Ordering information 3.

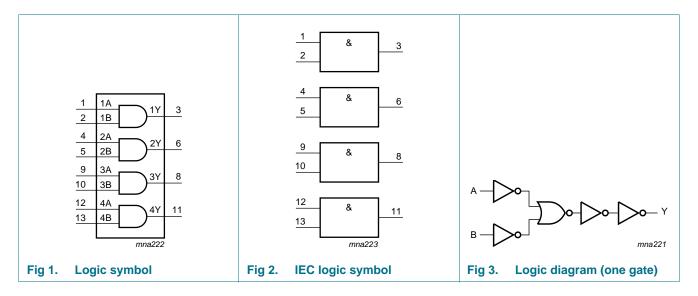

Table 1. **Ordering information**

Type number	Package							
	Temperature range	Name	Description	Version				
74ABT08N	–40 °C to +85 °C	DIP14	plastic dual in-line package; 14 leads (300 mil)	SOT27-1				
74ABT08D	–40 °C to +85 °C	SO14	plastic small outline package; 14 leads; body width 3.9 mm	SOT108-1				
74ABT08DB	−40 °C to +85 °C	SSOP14	plastic shrink small outline package; 14 leads; body width 5.3 mm	SOT337-1				
74ABT08PW	−40 °C to +85 °C	TSSOP14	plastic thin shrink small outline package; 14 leads; body width 4.4 mm	SOT402-1				

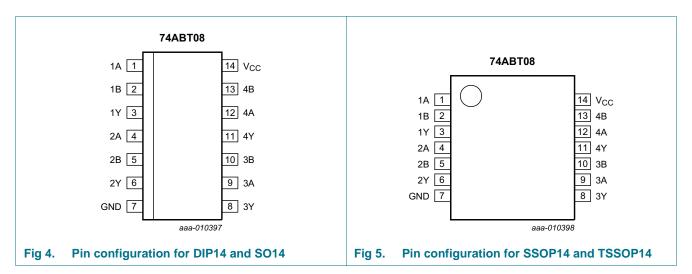

Quad 2-input AND gate

4. Functional diagram

5. Pinning information

5.1 Pinning

Product data sheet

Quad 2-input AND gate

5.2 Pin description

Table 2. Pin description

Symbol	Pin	Description
1A to 4A	1, 4, 9, 12	data input
1B to 4B	2, 5, 10, 13	data input
1Y to 4Y	3, 6, 8, 11	data output
GND	7	ground (0 V)
V _{CC}	14	supply voltage

6. Functional description

Table 3. Function table[1]

Input		Output
nA	nB	nY
L	X	L
X	L	L
Н	Н	Н

^[1] H = HIGH voltage level; L = LOW voltage level; X = don't care.

7. Limiting values

Table 4. Limiting values

In accordance with the Absolute Maximum Rating System (IEC 60134).

Symbol	Parameter	Conditions		Min	Max	Unit
V _{CC}	supply voltage			-0.5	+7.0	V
VI	input voltage		<u>[1]</u>	-1.2	+7.0	V
Vo	output voltage	output HIGH or LOW	<u>[1]</u>	-0.5	+5.5	V
I _{IK}	input clamping current	V _I < 0 V		-18	-	mA
I _{OK}	output clamping current	V _O < 0 V		-50	-	mA
Io	output current	output in LOW-state		-	40	mA
Tj	junction temperature		[2]	-	150	°C
T _{stg}	storage temperature			-65	+150	°C

^[1] The input and output voltage ratings may be exceeded if the input and output current ratings are observed.

74ABT08

^[2] The performance capability of a high-performance integrated circuit in conjunction with its thermal environment can create junction temperatures which are detrimental to reliability. The maximum junction temperature of this integrated circuit should not exceed 150 °C.

Quad 2-input AND gate

8. Recommended operating conditions

Table 5. Operating conditions

Voltages are referenced to GND (ground = 0 V).

Symbol	Parameter	Conditions	Min	Тур	Max	Unit
V _{CC}	supply voltage		4.5	-	5.5	V
VI	input voltage		0	-	V _{CC}	V
V _{IH}	HIGH-level input voltage		2.0	-	-	V
V_{IL}	LOW-level input voltage		-	-	0.8	V
I _{OH}	HIGH-level output current		–15	-	-	mA
I _{OL}	LOW-level output current		-	-	20	mA
Δt/ΔV	input transition rise and fall rate		0	-	5	ns/V
T _{amb}	ambient temperature	in free air	-40	-	+85	°C

9. Static characteristics

Table 6. Static characteristics

Symbol	Parameter	Conditions			25 °C		-40 °C t	o +85 °C	Unit
				Min	Тур	Max	Min	Max	
V _{IK}	input clamping voltage	$V_{CC} = 4.5 \text{ V}; I_{IK} = -18 \text{ mA}$		-1.2	-0.9	-	-1.2	-	V
V _{OH}	HIGH-level output voltage	$V_{CC} = 4.5 \text{ V}; I_{OH} = -15 \text{ mA};$ $V_I = V_{IL} \text{ or } V_{IH}$		2.5	2.9	-	2.5	-	V
V _{OL}	LOW-level output voltage	V_{CC} = 4.5 V; I_{OL} = 20 mA; V_I = V_{IL} or V_{IH}		-	0.35	0.5	-	0.5	V
I _I	input leakage current	$V_{CC} = 5.5 \text{ V}; V_I = \text{GND or } 5.5 \text{ V}$		-	±0.01	±1.0	-	±1.0	μΑ
I _{OFF}	power-off leakage current	$V_{CC} = 0 \text{ V}; \text{ V}_{I} \text{ or } \text{V}_{O} \le 4.5 \text{ V}$		-	±5.0	±100	-	±100	μΑ
I _{CEX}	output high leakage current	HIGH-state; $V_O = 5.5 \text{ V}$; $V_{CC} = 5.5 \text{ V}$; $V_I = \text{GND or } V_{CC}$		-	5.0	50	-	50	μΑ
Io	output current	$V_{CC} = 5.5 \text{ V}; V_{O} = 2.5 \text{ V}$	<u>[1]</u>	-50	-75	-180	-50	-180	mA
I _{CC}	supply current	$V_{CC} = 5.5 \text{ V}; V_I = \text{GND or } V_{CC}$		-	2	50	-	50	μΑ
Δl _{CC}	additional supply current	per input pin; V _{CC} = 5.5 V; one input at 3.4 V; other inputs at V _{CC} or GND	[2]	-	0.25	500	-	500	μΑ
C _I	input capacitance	$V_I = 0 \text{ V or } V_{CC}$		-	3	-	-	-	pF

^[1] Not more than one output should be tested at a time, and the duration of the test should not exceed one second.

Product data sheet

^[2] This is the increase in supply current for each input at 3.4 V.

Quad 2-input AND gate

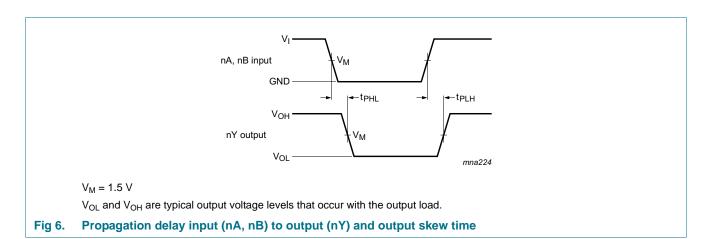

10. Dynamic characteristics

Table 7. Dynamic characteristics GND = 0 *V; for test circuit, see Figure 7.*

Symbol	Parameter	Conditions	25 °C	; V _{CC} =	5.0 V	-40 °C to V _{CC} = 5.0	Unit	
			Min	Тур	Max	Min	Max	
t _{PLH}	LOW to HIGH propagation delay	nA, nB to nY; see Figure 6	1.0	2.4	3.4	1.0	4.0	ns
t _{PHL}	HIGH to LOW propagation delay	nA, nB to nY; see Figure 6	1.0	1.9	2.8	1.0	3.0	ns
t _{sk(o)}	output skew time	[1]	-	0.4	0.5	-	0.5	ns

^[1] Skew between any two outputs of the same package switching in the same direction. This parameter is guaranteed by design.

11. Waveforms

15. Legal information

15.1 Data sheet status

Document status[1][2]	Product status[3]	Definition
Objective [short] data sheet	Development	This document contains data from the objective specification for product development.
Preliminary [short] data sheet	Qualification	This document contains data from the preliminary specification.
Product [short] data sheet	Production	This document contains the product specification.

- [1] Please consult the most recently issued document before initiating or completing a design.
- [2] The term 'short data sheet' is explained in section "Definitions"
- [3] The product status of device(s) described in this document may have changed since this document was published and may differ in case of multiple devices. The latest product status information is available on the Internet at URL http://www.nxp.com.

15.2 Definitions

Draft — The document is a draft version only. The content is still under internal review and subject to formal approval, which may result in modifications or additions. NXP Semiconductors does not give any representations or warranties as to the accuracy or completeness of information included herein and shall have no liability for the consequences of use of such information.

Short data sheet — A short data sheet is an extract from a full data sheet with the same product type number(s) and title. A short data sheet is intended for quick reference only and should not be relied upon to contain detailed and full information. For detailed and full information see the relevant full data sheet, which is available on request via the local NXP Semiconductors sales office. In case of any inconsistency or conflict with the short data sheet, the full data sheet shall prevail.

Product specification — The information and data provided in a Product data sheet shall define the specification of the product as agreed between NXP Semiconductors and its customer, unless NXP Semiconductors and customer have explicitly agreed otherwise in writing. In no event however, shall an agreement be valid in which the NXP Semiconductors product is deemed to offer functions and qualities beyond those described in the Product data sheet.

15.3 Disclaimers

Limited warranty and liability — Information in this document is believed to be accurate and reliable. However, NXP Semiconductors does not give any representations or warranties, expressed or implied, as to the accuracy or completeness of such information and shall have no liability for the consequences of use of such information. NXP Semiconductors takes no responsibility for the content in this document if provided by an information source outside of NXP Semiconductors.

In no event shall NXP Semiconductors be liable for any indirect, incidental, punitive, special or consequential damages (including - without limitation - lost profits, lost savings, business interruption, costs related to the removal or replacement of any products or rework charges) whether or not such damages are based on tort (including negligence), warranty, breach of contract or any other legal theory.

Notwithstanding any damages that customer might incur for any reason whatsoever, NXP Semiconductors' aggregate and cumulative liability towards customer for the products described herein shall be limited in accordance with the *Terms and conditions of commercial sale* of NXP Semiconductors.

Right to make changes — NXP Semiconductors reserves the right to make changes to information published in this document, including without limitation specifications and product descriptions, at any time and without notice. This document supersedes and replaces all information supplied prior to the publication hereof.

Suitability for use — NXP Semiconductors products are not designed, authorized or warranted to be suitable for use in life support, life-critical or safety-critical systems or equipment, nor in applications where failure or malfunction of an NXP Semiconductors product can reasonably be expected to result in personal injury, death or severe property or environmental damage. NXP Semiconductors and its suppliers accept no liability for inclusion and/or use of NXP Semiconductors products in such equipment or applications and therefore such inclusion and/or use is at the customer's own risk

Applications — Applications that are described herein for any of these products are for illustrative purposes only. NXP Semiconductors makes no representation or warranty that such applications will be suitable for the specified use without further testing or modification.

Customers are responsible for the design and operation of their applications and products using NXP Semiconductors products, and NXP Semiconductors accepts no liability for any assistance with applications or customer product design. It is customer's sole responsibility to determine whether the NXP Semiconductors product is suitable and fit for the customer's applications and products planned, as well as for the planned application and use of customer's third party customer(s). Customers should provide appropriate design and operating safeguards to minimize the risks associated with their applications and products.

NXP Semiconductors does not accept any liability related to any default, damage, costs or problem which is based on any weakness or default in the customer's applications or products, or the application or use by customer's third party customer(s). Customer is responsible for doing all necessary testing for the customer's applications and products using NXP Semiconductors products in order to avoid a default of the applications and the products or of the application or use by customer's third party customer(s). NXP does not accept any liability in this respect.

Limiting values — Stress above one or more limiting values (as defined in the Absolute Maximum Ratings System of IEC 60134) will cause permanent damage to the device. Limiting values are stress ratings only and (proper) operation of the device at these or any other conditions above those given in the Recommended operating conditions section (if present) or the Characteristics sections of this document is not warranted. Constant or repeated exposure to limiting values will permanently and irreversibly affect the quality and reliability of the device.

Terms and conditions of commercial sale — NXP Semiconductors products are sold subject to the general terms and conditions of commercial sale, as published at http://www.nxp.com/profile/terms, unless otherwise agreed in a valid written individual agreement. In case an individual agreement is concluded only the terms and conditions of the respective agreement shall apply. NXP Semiconductors hereby expressly objects to applying the customer's general terms and conditions with regard to the purchase of NXP Semiconductors products by customer.

No offer to sell or license — Nothing in this document may be interpreted or construed as an offer to sell products that is open for acceptance or the grant, conveyance or implication of any license under any copyrights, patents or other industrial or intellectual property rights.

Export control — This document as well as the item(s) described herein may be subject to export control regulations. Export might require a prior authorization from competent authorities.

Non-automotive qualified products — Unless this data sheet expressly states that this specific NXP Semiconductors product is automotive qualified, the product is not suitable for automotive use. It is neither qualified nor tested in accordance with automotive testing or application requirements. NXP Semiconductors accepts no liability for inclusion and/or use of non-automotive qualified products in automotive equipment or applications.

In the event that customer uses the product for design-in and use in automotive applications to automotive specifications and standards, customer (a) shall use the product without NXP Semiconductors' warranty of the product for such automotive applications, use and specifications, and (b) whenever customer uses the product for automotive applications beyond

NXP Semiconductors' specifications such use shall be solely at customer's own risk, and (c) customer fully indemnifies NXP Semiconductors for any liability, damages or failed product claims resulting from customer design and use of the product for automotive applications beyond NXP Semiconductors' standard warranty and NXP Semiconductors' product specifications.

Translations — A non-English (translated) version of a document is for reference only. The English version shall prevail in case of any discrepancy between the translated and English versions.
