Shaving time

A fully charged shaver has a shaving time of up to 30 minutes.

Using the appliance

Shaving

- 1 Switch the appliance on by pressing the switch lock (1) and pushing the on/off slide upwards (2).

Note: The switch lock prevents accidental switching on of the appliance.

- 2 Move the shaving heads quickly over your skin, making both straight and circular movements.

Shaving on a dry face gives the best results. Your skin may need 2 or 3 weeks to get accustomed to the Philips shaving system.

- 3 Switch the shaver off by pushing the on/off slide downwards.
- 4 Put the protection cap on the shaver every time you have used it, to prevent damage.

Cleaning and maintenance

Regular cleaning guarantees better shaving performance.

- For easy and optimal cleaning, the Philips Action Clean (shaving head cleaner, type HQ100) is available. Ask your Philips dealer for information.

Note: The Philips Action Clean may not be available in all countries. Contact the Customer Care Centre in your country about the availability of this accessory.

You can also clean the shaver in the following way:

Every week: shaving unit and hair chamber

- 2 Clean the top of the appliance first, using the brush supplied.

- 3 Press the release button (1) and remove the shaving unit (2).
